-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 April 2005.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

1. Claims 14-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 4/14/05.

2. Applicant's election with traverse of Group I in the reply filed on 4/14/05 is acknowledged. The traversal is on the ground(s) that no undue burden has been established if each of the claims were examined together. This is not found persuasive because "replaceable" in Group I is different from "easily detachable" in Group II. Search for Group I would not result in finding an art for Group I due to these different details.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the

Art Unit: 2872

art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior in Fig. 4 in view of Nakasugi et al (US 6,145,377).

The admitted prior art discloses a polygon mirror scanner comprising a rotor comprising a rotating shaft (2), a polygon mirror (1), a magnet (4) and a bearing device (20) comprising a radial bearing (21), thrust bearing (22), stator yoke and a stator comprising a coil (31) facing the magnet (see Fig. 4) with a predetermined distance therebetween, a standard portion comprising a control base (32) that is configured to vertically stabilize the radial bearing using the standard surface of the control base plate, the radial bearing has a collar on a bottom peripheral surface thereof in a circumferential direction thereof (see 21). However, the thrust bearing and the radial bearing are not replaceable. Nakasugi et al discloses a bearing that is replaceable (see column 3, lines 30-35). The radial bearing comprises a screw groove (Fig. 2, see grooves for screws). A stator yoke comprises a cylindrical central hole (see holes near 17). It would have been obvious to one of ordinary skill in the art to have bearings to be replaceable because the bearings get more wear on them than other parts of

Art Unit: 2872

the polygon mirror, and also it is widely known that bearings are replaceable for other devices other than polygon mirrors.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to EUNCHA P. CHERRY whose telephone number is 571-272-2310. The examiner can normally be reached on M-F 6:30-4:00, alternate Fridays off.
